

Technical

- Minimising windage of front and side surface through combined frame and modules .
- Low total weight of complete system, same size with traditional 2000W Metal Halide/HPS.
- Easy to install and maintain, flexible mouting system especially the new IP66 driver box, absence of complex wiring between driver box and luminaire, also the modules.
- Minimising TCO by maximum and constant light output with effective thermal management to extend product lifetime and minimize maintenance costs.
- LED uses standardized IES LM-80-08 and TM-21-11 methods for collecting long-term data and extrapolating LED lumen maintenance.
- Al1070 pure aluminum body, seamless link of aerometal materials and numerous vents on heat sink improved heat management, keeps away from all field heat,ensures the stability of light system.
- Salt-spray-testing level 1000hours/2000hours/3000hours for your special projects requirements.
- Equipped with 10KV/20KV SPD, resist huge grid surge.

Optical

- TLCl>90, Broadcast Ready for >1000fps, HD | 4K | 8K, enable TV broadcasters to film super-slow-motion replays with a flicker factor <1%
- Engineered by adopting seamless link of advanced Free-form optics
- Optics deisgned with unique "multi scales lenses" to make uniform light distribution and glare-reducing.
- High transmittance PC cover, anti-UV, IK10 protective grade, prevent LED chips vulcanization and dust accumulation on the lens.
- Symmetrical and Asymmetrical light distribution enhancing uniformity of vertical and horizontal, meanwhile reducing light spill especially back pole light in residential area.

Control

- Scalable control solution, enables customisable, with real-time overrides and supports Art-Net, DMX RDM and DALI protocols.
- Support multi-Intelligent controls, WIFI.

Application

Indoor Stadium | Outdoor Stadium | Wharf | Apron Lighting | Large Area Illumination
| Tower Lighting | Sports Facility
